Definitions:

- **Pre-Sentence:** The portion of the criminal justice process from time of arrest to time of sentencing.

- **Average Daily Population (ADP):** Average number of inmates in the secure populations on a daily basis. Total number of inmate days divided by the number of days in the time period.

- **Average Length of Stay (ALOS):** The total number of days during the total incarceration event that a person was held as a pre-sentence felon when a pre-sentence felony is the most serious offense. The most serious offense is selected from a ranking algorithm. If there is sentenced time associated with the charge, that time is not counted in the calculation of pre-sentence felon length of stay. The ALOS is calculated for the cohort of inmates released during the month. Due to small populations in many of the categories, large swings in ALOS should not be relied upon for monthly comparisons. Drugs and property are the exceptions, as they have enough people in them to support the analysis of trends over time.

- **Placements:** DAJD has traditionally reported the number of bookings as the measure of admission. A single booking covers all activity from the time of admission to the time of release from custody. For the purpose of data tracking, it was necessary to develop a new measure to track location movements within a booking. In the case of pre-sentence felons, a placement is also a booking since it is based on the status of the most serious offense for the booking.

Definitions:

- **Pre-Sentence:** The portion of the criminal justice process from time of arrest to time of sentencing.

- **Average Daily Population (ADP):** Average number of inmates in the secure populations on a daily basis. Total number of inmate days divided by the number of days in the time period.

- **Average Length of Stay (ALOS):** The total number of days during the total incarceration event that a person was held as a pre-sentence felon when a pre-sentence felony is the most serious offense. The most serious offense is selected from a ranking algorithm. If there is sentenced time associated with the charge, that time is not counted in the calculation of pre-sentence felon length of stay. The ALOS is calculated for the cohort of inmates released during the month. Due to small populations in many of the categories, large swings in ALOS should not be relied upon for monthly comparisons. Drugs and property are the exceptions, as they have enough people in them to support the analysis of trends over time.

- **Placements:** DAJD has traditionally reported the number of bookings as the measure of admission. A single booking covers all activity from the time of admission to the time of release from custody. For the purpose of data tracking, it was necessary to develop a new measure to track location movements within a booking. In the case of pre-sentence felons, a placement is also a booking since it is based on the status of the most serious offense for the booking.

- **Rolling Average:** Average of current and prior two months' counts.

King County Department of Adult and Juvenile Detention

Detention and Alternatives Report

Adult Pre-Sentence Felons by Most Serious Offense (MSO)

3-Month Rolling Average Counts - 2011
